JS Skills I:

Linking external JS, Conditionals, Calling Functions

1. Create JS/main.js in website repo

2. Open website repo in Desktop.
   Pull changes.
   Open repo in explorer.
   Open index and main.js in sublime/other editor

3. Create button in index

```
<!-- JS demo -->
<button onclick="A1()">Click</button>
```

4. Create link to external JS in <head> of index

```
<script type="text/javascript" src="JS/demo.js"></script>
```

Note: You must link every page that uses JS

5. Create a function that prompts user for input and outputs "notes to self" to console

```
function A1(){

  var fName = prompt("Hey, what's your name?", name);
  var myColour = prompt("Pick a colour, "+fName);

  if (myColour == "red"){
    console.log("Looks like this guy likes red. Noted")
  }

  else if (myColour == "yellow"){
    console.log("This guy chose yellow. Hmm")
  }

  else {
    console.log(fname+" chose a colour I hadn't thought of: "+ myColour)
  }
}
```

6. To view console in your browser, hit F12 and select the 'console' tab. Then click your button
